

Rocky Mountain Windows Technology User Group

Description:

The RMWTUG (www.rmwtug.org) is for managers, developers and administrators of Microsoft Windows desktop and server systems, including Windows Vista and Windows Server 2008. The RMWTUG meets monthly, with chapters in Denver and Colorado Springs.

The RMWTUG RSS feed is www.rmwtug.org/rss.xml.

The group was started in June 1994 and was originally known as the Rocky Mountain Windows NT User Group.

The RMWTUG is holding a special Virtualization Mini-Conference on September 29, 2008 in Denver, Colorado. We will discuss and demonstrate ESX from VMware and Hyper-V from Microsoft.

Country: United States

State: CO

City: Arvada
